

CREATED & PRESENTED BY **DON SHOMETTE**

ASSESS & PROGRESS

STUDENT THREAT ASSESSMENTS. **REVOLUTIONIZED.**

New. Exciting. Better. Safer. Holistic. Enhanced.
Revolutionized.

Assess & Progress gives you the skills to quickly and accurately **assess** if a student truly poses a danger and the abilities and materials to **progress** them to a safer place.

How Assess & Progress is Different...and **Better!**

THREAT ASSESSMENTS	ASSESS & PROGRESS
Punishment based	----> Growth based
Prioritizes finding problems over solutions	Prioritizes finding solutions through growth
No value to students...it's something done to them and not with them	----> Invaluable to students because they fully participate learning lifelong growth skills
Stops the moment risk level is determined	----> Continues until the student is no longer a threat
Conditions schools to see every behavior as a threat	----> Conditions schools to treat student behaviors holistically
Pits schools against students and families against schools	----> Brings everyone together with positive goals of growth
Pushes parents aside making it impossible for them to help	----> Gives parents materials making it easy for them to help
Stigmatizes everyone ...because schools are not made for this approach	----> Stigmatizes no one ...because this is exactly what schools do best -- help students grow
Focuses only on safety...	----> Focuses on safety...and the student's emotional, social, academic, and personal growth and well being... and so much more!
